FALL 1922

CHASE NURSERY COMPANY

INCORPORATED

CHASE, ALABAMA

"CHASE'S ALABAMA GROWN"

HENRY B. CHASE
PRESIDENT

ROBERT C. CHASE
SEC'Y-TREAS.

CHASE, ALABAMA,

September 30, 1922.

To the Trade:

Price declines are noticeable when you compare this Trade-List with last season's. Many items are still in short supply however and all such items we have earnestly endeavored to price at their true value.

With bumper crops, a big building program started the country over, every one optimistic over business conditions generally, except for the Coal and Railroad situation, the old U. S. A. is just a rearin' to go—and will go and go big once the miners and the railroad workers get straightened out. May it be soon!

The rush season will soon be on. There will be times when you must have quick service and it would then be well for you to bear in mind that Chase is served by two railroads, both Express Companies, both Telegraph Companies and that SERVICE is our constant aim. Your orders large or small are always appreciated.

Yours very truly,

CHASE NURSERY COMPANY.

Our thirty-second year in Alabama.

TERMS AND CONDITIONS

SHIPMENTS

Please state how you want your shipments made, whether by freight or express; also route. Where no instructions are given, we will ship as we think best serves your interests without assuming responsibility.
The risk and cost of transportation belong to purchaser.

CREDIT

Usual terms to parties of known responsibility. We will not accept orders until we believe the buyer is good for the account. Cash before shipment required from parties unknown to us, or references with sufficient time for investigation before shipment.

PRICES

We quote prices per 10, per 100, per 1,000, as our stock warrants, and will supply nurserymen and dealers at prices named regardless of the size of the order, except in cases of long assorted lists of small quantities, when an additional charge will be made to cover the extra labor involved. **Prices are subject to market changes.**

GRADES

We grade liberally by caliper and height. When both are specified, caliper measure governs, but we are careful to see that stock is uniform throughout. Our rule is: **"When in doubt, put it in the lower grade."**
All stock is graded and bunched in our storage houses, where we have water in abundance. Stock is handled from field to these buildings under large tarpaulins and roots kept moist until boxed.

BUNCHING

Fruit Trees, 1 to 2, and 2 to 3 feet, are tied 25 to the bunch; all larger grades, 10 to the bunch. Please make your orders in multiples of these quantities.

LIABILITY AND CLAIMS

We are not liable for injury to stock from frost, hail, fire, or other causes beyond our control, and book all orders with this understanding. While we use every means at our command to secure prompt delivery, **we are not liable for delays in transit; our responsibility ends, upon delivery in good order to railway company.** Remedy for loss must lie between the buyer and the railway company, but we will gladly render all the aid we can. Any other claims must be made immediately after receipt of stock.

NON-WARRANTY CLAUSE

We give no warranty, express or implied, as to description, quality, productiveness, or any other matter, of any nursery stock, seeds, bulbs or plants we sell.

OUR OFFICE AT CHASE

SUBSTITUTION

We do not substitute unless instructed to do so, and then label true to name.

CODE WORDS—TELEGRAPHIC ORDERS

When more than one grade is listed, a code word is used. Much expense can be saved in telegraphic orders by using these code words.

BOXING

Charges as low as possible for well-made boxes, paper-lined:

	7½ ft.	9 ½ft.
30 x 30	$3.50	$4.00
24 x 30	3.25	3.50
24 x 24	3.00	3.25
18 x 24	2.50	2.75
18 x 18	2.25	2.50
15 x 15	1.75	...
12 x 12	1.50	...

On orders for roses, small fruits, etc., we can frequently use dry goods cases or shoe boxes at lower cost, and shall endeavor at all times to make lowest possible charges.

Bales: 25 cents to $3.50, according to size.

REFERENCE

As to our standing and responsibility we refer to any bank or business house in Huntsville, Alabama, the Commercial Agencies, and the leading nurserymen of the United States.

We cannot undertake to supply long and much assorted lists of stock calling for only small quantities of each kind, save at an advance of 10 to 25 per cent above our printed rates.

DIRECTIONS FOR FUMIGATING NURSERY STOCK WITH HYDROCYANIC ACID GAS

The necessary equipment consists of an air-tight chamber, (box or room), a glazed earthenware vessel, a measuring glass graduated to ounces, and a set of accurate scales. The necessary chemicals are either Cyanide of Potash (98%) or Sodium Cyanide (96-98%) and Sulphuric Acid (Specific gravity 1.83). Care should be taken to secure either the 98% Cyanide of Potash or 96-98% Sodium Cyanide, otherwise an insufficient amount of gas would be generated. This chemical must be kept in air-tight containers and so packed will keep indefinitely. It is a deadly poison and should not be left where it will fall into the hands of children or careless persons, and should never be handled by a person having open sores, cuts or bruises on his hands. The gas is colorless and if inhaled in quantity is fatal; smaller amounts induce headache or dizziness.

The best commercial grade of Sulphuric Acid should be used. This acid must be kept in a glass or earthenware vessel tightly stopped with a glass or lead stopper. Be sure that your fumigating box or room is air-tight or gas-proof.

The standard formula for fumigating each 100 cubic feet of space contained in the fumigating house is as follows:

One ounce Cyanide of Potash (98%) or ¾ of one ounce Sodium Cyanide (96-98%).

Two Fluid ounces Sulphuric Acid.

Four Fluid ounces Water.

The glazed earthenware vessel should be somewhat larger than is necessary to hold the chemicals. A one or two gallon jar is perhaps the best container.

The trees as dug and brought from the field, should be placed in the fumigating house, care being taken to see that they are free from any considerable quantities of mud or dirt. The trees should not be fumigated when they are wet, as it has been shown that in this condition they are likely to be injured by the gas. When the compartment is full of stock, close all openings except the door. Place the jar on the floor near the middle of the room, pour in the required amount of water, and then slowly pour in the acid. The cyanide previously weighed and inclosed in a tight paper bag is now dropped into the jar and the operator leaves immediately and closes the door tight. The steps in this operation should never be varied. If water is poured into the acid, a violent action takes place and may be the cause of injury to the operator. Inclosing the cyanide in a paper bag makes it convenient and safe to handle and retards the generation of the gas for a moment after being dropped, thus allowing time to leave the room and close the door securely.

Keep the room closed for forty minutes, at the end of which time the door and window should be thrown open, care being taken to avoid the outward rush of the gas. After fifteen minutes of airing, the room may be safely entered and the stock removed, being now ready for packing or heeling in. After fumigating the contents of the jar should be buried.

Buy chemicals of your local druggist if you can secure Merck's cyanide in unbroken, original packages, and sulphuric acid that has been kept in a glass-stoppered bottle.

"IT PAYS TO BE DECENT"

WHOLESALE TESTIMONIALS

New York, Jan. 26, 1922.—"Thought possibly you might be interested in knowing something about how that bulk car of stock came through. It landed here on the morning of January 24. The thermometer was at zero mark and was nearly there the morning before with a high wind on Sunday. Naturally, we didn't open the car when it landed here. Wednesday morning came out nice and bright and we opened up the car door on the south side expecting of course to find it frozen, but thanks to your good packing the stock was not frozen.

"The above may not be of any particular interest to you, but we just wanted you to know that we liked the way in which you packed this car. Thank you."

Iowa, Dec. 30, 1921—"This is as fine a lot of Privet as a company could possibly wish for, and we wish to thank you for the care and attention given in making the grade so uniform and so completely up to the standard under which it was sold. The care exercised in packing this car is also appreciated and the boys who put the straw on the bottom of the car and saw that plenty of it was put between the roots and the sides, deserve credit for having done a good job."

Michigan, March 21, 1922.—"Car load of stock arrived in very good condition and we are well pleased with the grade of material which we find checks up O. K."

North Carolina, Nov. 19, 1921.—"The carload of nursery stock arrived in record time and in excellent condition. We certainly appreciate your prompt service and business like way you have followed up this shipment."

Connecticut, Dec. 13, 1921.—"We have checked over your car of stock received some time ago. We will say for your benefit that this is one of the nicest cars we received this fall. It certainly is a pleasure to do business with a high class firm, no reject report to send you."

Iowa, Dec. 10, 1921.—"The various shipments of stock as per your invoices of Nov. 21st, 22nd and 24th, received in good condition and all satisfactory.
